Digital Printing Association  
Surface design in digital Transformation

## Digital Printing Association (DIPA)

Digital Printing Association (DIPA) represents and offers a cooperation network for SMEs and industrial companies that are involved in different steps of the value-added process of an individually created surface. We support network members on their way to a perfectly individually created surface and offer an important platform facilitating the exchange between companies.

The aim of DIPA is to take a holistic view of the individual surface design process and to make the possibility of industrial digital printing accessible to many users as an innovative process.

Become a member of our network of experts  
and contribute to the future of digital printing!

## Surface design in digital Transformation

The Digital Printing Association (DIPA) sees itself as a joint „future workshop“ for topics such as consulting, knowledge transfer within the framework of the DIPA Academy and standardisation or certification.

## Future talents – DIPA strategy

Attract – Grow – Retain talents in digital printing

- DIPA Academy – we learn the future in digital printing
- AI – future in digital decor printing
- Ecosystems – collaborate to innovate
